Course Catalog - Sociology

B.A. in Sociology with a Concentration in Health and Medicine - B.A. in Sociology with a Concentration in Health and Medicine

Type:Major

Health and Medicine Concentration (Sociology Majors)

Medical sociology is the study of the societal dimensions of health and medicine.

It is a well-recognized field that offers great preparation for graduate school in the health-related professions. The Sociology Department has a good sequence of courses in the department for students with a pre-med or pre-health career path. Students often plan to go to medical school, attend a graduate program in health services administration, or seek a program in social work. Students may seek jobs in human resources as well as recruiting in a health software companies.

The **Health and Medicine** concentration introduces students to the relationship between society and health. In this concentration, students will study the impact of social, cultural, political, and economic factors on health and vice-versa. Courses in this area examine issues such as health behavior, physical and mental illnesses, doctor-patient interaction, medicalization, health care reform, health care delivery and health policy. This concentration is for students interested in jobs related to medical, mental health, or social service fields, patient advocacy, mental health facilities or nursing homes, administrative positions, and program planning.

Health and Medicine Concentration (requirements)

The Sociology program offers a Health and Medicine concentration for Sociology majors. These options are designed to offer training to those interested in pursuing a career in serving the aging. Both the concentration and the minor provide a strong basis in critical issues of the field, and practical hands-on experience through the internship. Graduates with a minor or concentration in gerontology will have the foundation for pursuing a variety of careers.

Student Learning Objectives

Graduates with a concentration in Health and Medicine should demonstrate:

- Competency in the basic components and knowledge involving the services involving medical care, research and health issues for a global population and the population in the U.S.
- An understanding of the contemporary issues in healthcare facing the population and the social issues involved
- An awareness of global healthcare issues facing a world population

Assessment of Learning Objectives:

Sociology majors graduating with a concentration in gerontology are required to successfully complete the capstone senior seminar, research and defend a senior paper as well as pass a major field exit examination. Through these requirements, students must demonstrate their mastery of the major's objectives.

For a Sociology major with a Health and Medicine concentration, a total of 36 semester hours is required:

15 hours of *Health and Medicine* courses

SOCI 2300 - Sociology of Sports

Sports have made an enduring impact on the social world in which we all live and represent an important aspect of our everyday lives and our leisure time. The organization of sports is a reflection of the organization of society. By critically studying the relationship between sports and society we will gain a greater understanding of society as a whole. The goal of this course is to apply a sociological lens to the world of sports and athletics (a distinction that will be examined) through the incorporation of academic writing, popular media, and personal experiences. Using these tools, the student will explore the ways in which sports are entangled in social, cultural, political, and economic forces operating at many different levels (local and global).

SOCI 2350 - Death and Dying

Everything that is alive eventually dies, thus death is a part of life. Understanding death can help us to understand and experience life more fully, and it can help us to make appropriate, compassionate responses to death and dying. The question of death, with or without religious guidance, is essentially ethical – what to do in recognition of the fact that we, everyone we love, and everyone who loves us, is going to die. In order to better understand ourselves and others, and the diversity of loss experiences, this course examines how social, cultural, and historical factors influence individuals' coping responses during loss and the last stage of life. Difficult and controversial health care, end of life, care giving needs, and after life issues are also be explored.
